Club World

First

Introduction:

On certain planned long-haul flights, we may operate a 4-class aircraft (F, J, W, M) while only selling three classes (J, W, M), with First not available. This may also occur if there is an aircraft change, where a flight is operated by a 4-class aircraft instead of the usual 3-class, or due to operational disruption.

In such cases we are standardising the process by centrally allocating these unoccupied seats in the First cabin. This allocation will be based on a priority order that includes factors such as British Airways Club status, ticket type, staff onload priority, and considerations for service recovery or recognition opportunities when applicable.

SEAT ALLOCATION POLICY:

This policy can be found in Docunet within our Customer Service Policy Manual, A.5.13.1

In summary:

On all services operated by a 4-class aircraft on 3-class routes, if the Club World cabin is full or oversold and additional capacity is needed in the First cabin, the following priority order will be used **after Premier and Gold Guest List customers have been moved, regardless of customer destination:**

- Premier
- Gold Guest List (GGL)
- F Priority Staff
- Gold (Emerald)
- Silver (Sapphire)
- J-entitled staff
- Bronze (Ruby)

Seat amendments will be made by the Airport Resolution Centre (ARC), ADM, or the departing airport.

OPERATING GUIDANCE FOR CREW

- **Cabin Occupancy:** When customers are moved into the First cabin, please refrain from requesting seating changes through the ARC, ADM, or departing airport. The updated policy will always be followed by ground teams.
- **First Bedding:** The First cabin will be dressed with First bedding. On request, please signpost to customers where their bedding is stored, which may be in the overhead lockers or, at the rear of the cabin
- **Cabin Privacy:** In-flight, curtains should be closed to protect the privacy of the First Cabin. Access to the cabin and toilets should be managed as per the First service snapshots. Curtains must be open whenever the aircraft is on the ground (boarding and disembarkation) and for TTOL
- **Galley Loading & Catering:** When the First cabin is not sold, regardless of seat changes made by the ARC, ADM, or the departing airport, catering will continue to be loaded in the MID galley. If the First cabin is sold as Club World, catering will be split between the FWD and MID galleys based on the cabin configuration. Galley operators should maintain clear communication to ensure meals are distributed smoothly, and the FWD galley ovens should be used to prepare meals for customers seated in the First cabin.
- **Crew Working Positions:** position allocation should reflect the normal process adopted when a 4-class aircraft is sold as a 3-class service. Please refer to AOR's and Delivery Standards documents. **If you have a full crew compliment, the IFM can use discretion as to how best to use the additional crew member.**
- **Meal Order Priority:** ensure that meal orders are taken in line with Club World service standards, detailed within the Club World Service Snapshots

OPERATING GUIDANCE FOR CREW

- **Wake Up Preferences:** Agree wake up preferences with customers. Wake up customers who requested to be woken for breakfast with a hot towel as per Club World Service Snapshots
- **Lighting:** Ensure the First lighting matrix is followed
- **Toilets:** should remain available to our customers seated in the First cabin and refreshed and re-stocked with The White Company amenities for use throughout the flight. In the event Elemis products are used, remove and replace with the correct amenities prior to customers boarding
- **Dry Stores:** Club World dry stores canisters will be available with a 'Club World In First' service, therefore please offer our customers Club World hot beverages throughout the flight
- **Dining Options:** Anytime Dining is not available in the First cabin when a 4-class aircraft operates as a 3-class service. Please offer a Club World dining experience as detailed in the Club World service snapshots
- **WiFi:** Free WiFi is not available to customers seated in the First cabin on these services

AIRCRAFT SERVICE DELIVERY VARIATIONS

789

Crew Compliment:

- No. 10 not carried
- Compliment of 9

Breaks: as per normal delivery standards.

Club World in First
